

# Equine Testimonials

This greatly improves the health of horses; I raise colts, and this prevents stresses from weaning and sales barn stress. Also I tell people this is free because you don't waste feed. You feed less grain, less hay because they get more out of the feed. At our horse sale, the highest priced yearling sold was on E-One, Gold Spike and Ocean Minerals.

- **A. (OH)**

Healthy Gut, Healthy Horse! Very happy on the results after starting E-One 3 years ago. My horses seem to have more energy and better hair coats than ever before when I was feeding minerals. A must feed product for Healthy Horses.

- **N.S (MI)**

ABSOLUTELY LOVE THIS PRODUCT. I use it on all horses I prep for sales including one that sold for \$67,000. It improves hair coat and overall body conditions. Less sore horses and more relaxed in the stall. I would not do without E-One.

- **Slab Equine (IN)**

After starting E-One we noticed our horses eating better. This resulted in better weight gain and hair coat. E-One works through the gut to promote a healthier digestive track.

- **AG Restores Farm's (IN)**

My gelding looks SO GOOD on Priority products! He has been ribby with a poor top line that I have been battling for a few years. I had him on GutX, which did help some, but what a difference since switching him to E-One and Gold Spike! And a quick difference!

- **E.D. (WI)**

My mini donkey suffered from Free Fecal Water Syndrome and nothing that I tried was working for him. I started him on a full scoop of E-One and ¼ large scoop of Gold Spike. It took nearly a year, seeing slow steady progress for the digestive system to get back on track, but his manure is finally back to normal! No more dirty hind legs or tail from loose manure."

- **B.H. (WI)**

I care for horses on a daily basis and prepare horses for sales. I have been preparing horses for sales that bring as much as \$22,000. I will not prep a horse for any show without E-One. I have found the use of E-One and Gold Spike to be a must-feed in daily routine and sales preparation. The daily use of E-One holds consistent intakes and shinier coats while Gold Spike is used for health ailments and inflammation.

- **J.N. (IN)**

Within one week after starting them on E-One, they began cleaning their buckets and putting on weight. We've had them on the Smartbacteria in E-One for 45 days now and are still impressed with the continued results.
