SHOWMEN'S CHOICE™

Specially formulated to help keep the digestive system on track before, during, and after shows.

Showmen's Choice is scientifically designed to help maintain a healthy rumen and gastrointestinal tract when fed daily. It contains branded strains of **Smartbacteria** A4000h™ and A2020™ that research shows utilize 83 times more glucose. It stimulates lactic acid use in the rumen and works in the lower intestinal tract to maintain a healthy population of beneficial bacteria. Field studies find these branded strains of **Smartbacteria** balance rumen pH.

Feeding Instructions

Feed Daily	1/3 - 1 (1oz scoop)
Support Digestive Health	1/2 - 1 (1oz scoop) scoop per day throughout show season or starting 7 days prior to the show and continuing through the show.

Store in a cool dry area, out of direct sunlight and avoid extreme heat.

Available in:
8lb,16lb containers

Testimonials

"I've been feeding P-One to my sheep when they're on grain. I find this makes them less susceptible to disease. I've also started feeding Ocean Minerals to my sheep, and I've seen huge benefits. Since adding Ocean Minerals I see more resistance to worms, likely due to the addition of copper. By adding these products, they are healthier and stronger!"

- L.M. (MO)

"I have around 500 sheep. When I first started, I had a sheep with gangrene mastitis. It was a favorite sheep of mine. My neighbor gave me some Gold Spike capsules. I open the capsules and gave some morning and evening. The udder had turned black, but the sheep recovered and fed her lambs off the other side. It was the first time I was successful without antibiotics. (The neighbor boy would sneak out to the barn and take the Gold Spike when the rest of the family would be getting sick. He won't get the flu everyone else was getting!)"
